Dear Henry:

The reprints and epidemiology manual have arrived and look very helpful. I am most grateful. Your encouragement in a trying time for me has meant a good deal. I have also received an invitation from the American Heart Association to attend the epidemiology meetings in February, thanks to you. I am very anxious to go but will have to find travel money somewhere. I'm not sure yet whether the Army will have funds available. I'll let you know how things are going as soon as I get settled. In the meantime, the good reading I have to enrich my evenings should help save me from the sirens of San Francisco at night.

Best wishes,

*Strassen?*
