Prof. Pierre W. Duchosal  
24 Blvd. des Philosophes  
Geneva, SWITZERLAND

Dear Prof. Duchosal:

The American Heart Journal annotation may well be a very effective impetus to the practical application of orthogonal systems. Is there any possibility of a commercial firm in Geneva and producing the plastic devices and electrodes?

We start the five year follow-up of men in Corfu in three weeks. I hope to see you at the Smolenice conference on VCG in September. Otto Schmitt could attend, as he will be in Vienna for a Biophysical Congress near that time. I have informed Dr. Ruttkay-Nedecky of this possibility, since for some reason Dr. Schmitt was not on the invitational list.

Best personal regards,

Henry Blackburn, M.D.
