August 16, 1966

Dr. Henry W. Blackburn, Jr.
Laboratory of Physiological Hygiene
University of Minnesota
Stadium Gate 27
Minneapolis 14, Minnesota

Dear Henry,

Thank you for your letter of August 11th and the manuscript which Leon and I will certainly read. How did you surmise that Dr. Burchell will probably send it to me for review? Did I tell you that I was asked to serve on the editorial board or did you find out some other way? Actually, I think I am the first epidemiologist serving in this capacity,- a sign of the dawn ...!

Thank you again on behalf of myself, although Leon had already written to you, for taking such good care of Mrs. Meade and Mrs. Khilji. They were both most enthusiastic about you and the course.

Wishing you and Nellie a most enjoyable time in Europe and with kindest regards,

Cordially yours,

Fred.
