COOPER - SCHILLING

Mr. Blackburn's Performance Study!

November 29, 1982

Family of Paul A. Schilling
2048 Lower St. Denis Road
St. Paul, MN. 55116

Dear Friends:

Apparently I am the latest to learn of your loss. With 33 years of association with Paul Schilling in our Twin Cities cardiovascular disease study, I am sure you know that we also feel your loss. His devotion, his sound judgment, his humor and his remarkable health despite obvious problems always made our annual visits a pleasure with him. His giving of himself to this research study is only one of his many philanthropies we know. It was one that had great meaning to us and to the field. The study in which he participated for so many years has led to very exciting and systematic efforts to reduce heart disease and stroke in the state of Minnesota.

We are grateful to him and to you, and want to express our condolences and affection to his family.

Cordially,

Henry Blackburn, M.D.
Professor and Director
