Harold A. Kahn, Statistician
Office of Biometry & Epidemiology
National Eye Institute
National Institutes of Health
Bethesda, MD 20014

Dear Harold,

Thanks. I cut and twisted only where I felt a couple of people have distorted the truth, joined vested interests or otherwise abused the public. But you're right, stilettos are dangerous and unnecessary.

All the best.

Cordially,

Sincerely yours,

Henry Blackburn, M.D.

Send

Dear Henry:

Please send me two copies of your review "Progress in the Epidemiology and Prevention of Coronary Heart Disease" from Progress in Cardiology -3, 1974.

Except for a possible reduction in knife twisting after cutting into a colleague's faulty design, unreasonable conclusion, or loose speculation I find it hard to imagine a better written or more thoughtful review of the matter.

All the best.

Sincerely yours,

Harold
