Professor Ancel Keys
"Minnelea"
84060 Pioppi (SA)
ITALY

Dear Ancel,

Many thanks for your time and trouble and good correspondence. I'm the leadoff witness May 13 for the FTC.

Dr. Siegel indicated after your departure that the organism was banal and properly sensitive to ampicillin. I'm glad you kept up the full course and it's all gone.

I'm just back from a day in London and three days in Paris where I made quite a splash (in French), but where I doubt many got wet.

Jerry Morris was a bit upset with remarks made by me (and by you) on his latest study. I have modified mine in the enclosed.

We are having some budgetary problems but otherwise things go well.

Regards,

Henry Blackburn, M.D.
