Dear Henry,

Many thanks for your letter written from Stanford. I have no doubt that my style as chairman can be improved upon. I am most grateful for the wisdom and experience you - and the other senior investigators - have contributed these past 4 years.

I am sorry not to have called you more. I had believed I was in touch with your thoughts through your many letters to me or with copies to me. If I erred in this regard, my apologies. I would respectfully indicate that I would have appreciated a call from you offering your advice or help in the St. Louis situation, Policy Advisory Board as Coordinating Center on forms, desire of interventions for more recognition, appraisal of the plan case results, how to satisfy our Davis members regarding the Committee of chairman,

performance of subcommittees, etc.

However, perhaps it is best to close by reiterating my sincere gratitude for your many and greatly appreciated contributions.

We have been fortunate to have had your presence and your support which have given the whole trial a much needed prestige and drive.

With warmest regards,

Oley
