Dear Nate:

I am delighted to hear that I will probably be seeing you both in Harrisburg and in Johannesburg in the next period.

There are lots of things I would love to chat about.

I was particularly interested in a letter from Dr. Beaton from Johannesburg recently that your origins had been converted from the Maccabeans to the Maccobys, probably some wandering savages in Scotland.

For our public lecture in Johannesburg, at 2000 hours on Wednesday, November 2, I presume we will have the usual sort of Pat and Mike arrangement so that I will draw the background of evidence and the potential for prevention, and you will talk about the good stuff.

Cordially,

Henry Blackburn, M.D.
Professor and Director
