Dear Hugh,

I have been meaning to write to you and inquire how you and Genevieve have been getting along in Lion. Henry Blackburn has been keeping me aware of his suggestions to you to return to the United States.

I want to add my thoughts which are that we would like very much to have you here on a permanent basis. I believe that you would be a great asset to our community and I also think that there is a great need for your particular ability here.

I would expect if you come here, that you would take part in our Hypertension Project as you have in the past.

I believe that Minneapolis and Minnesota have a great professional opportunity for you. Isabel joins me in sending our best regards to you and Genevieve and the children.

Sincerely,

Reuben Berman, M.D.
