HYGIENE

27th August, 1975.

Dear Henry,

Greetings! I have just returned from a visit to the North Karelia Project and wish you too had been there. 3½ years of the planned 5-year study have passed and it is full of problems. It did not help that I have had no contact with them for 4 years.

Pekka showed me a copy of your chapter in the book by Wolf and Eliot on the 'Practical Management of Hypertension'. I'd be most grateful for a xerox of this - and any other of your writings that are ready for circulation.

Best wishes,

Yours

*aje*  
*Henry*
