Dear Bob:

On behalf of my colleagues, I would like to submit the enclosed paper "Duration of Hospitalization in 'Uncomplicated Complete Acute Myocardial Infarction."

This material is essentially the sum and substance of a report made by the above Ad Hoc working group to the Secretary for HEW and will presumably be incorporated in PSRO regulations recommendations or whatever.

It was the opinion of all that the text should be submitted to the Journal of the American Medical Association for consideration both from the standpoint of dissemination to practicing physicians and hopefully as a meaningful vehicle for cooperative relationships with the health delivery planners.

Best regards,

J. Swan/EB
