Dear Henry,

As you know, I will be winding up my assignment with the Committee on Criteria and Methods at the end of this month. I want to take this opportunity to personally thank you for your cooperation in the Pooling Project. Your personal assistance in solving the EKG problem certainly meant a great deal to the successful completion of the data collection phase. I am sure you know where we would be if we had to wait for the individual studies to code their EKGs. While often the road has not been a smooth one, I think the end result will justify our efforts.

Aside from working together, it has been a great pleasure for me to become personally acquainted with you. I trust we shall meet from time to time in the future.

Best regards!

Sincerely,

*Allen*
