Dear Oley,

The letter of 19 May to you from Dr. McIntyre on disclosure of exercise test results emphasizes a considerable concern I have had about the lack of a decision-making body for clinical questions. I do not believe there is a place in the allotted committee structure for such issues. I don't know even if the Endpoints group has actually been given its charge and slot. They might also serve for clinical-related issues.

Cordially,

Henry Blackburn, M.D.
