Dear Dr. Henry Blackburn,

I came back to Japan safely on March 13 along with heavy drinking with Dr. Kimura in March 11th night.

To my regret, my trip was rather short and several days could not arranged in Mpls, but I could have a very nice time to talk with Dr. Prineas and other members of the Lab.

I here enclosed some basic material for the comment which I made at the conference - Trend in cardiovascular disease mortality in Japan.

The source of the material is

" Vital Statistics 1972 Japn volume 1 page 192-193" which is edited by Health and Welfare Statistics Department, Minister's Secretariat, Ministry of Health and Welfare, Japan.

Please take care of yourself.

With best wishes,

Sincerely yours

Yoshiyuki Ohno
Yoshiyuki Ohno M.D., M.P.H.

P.S. Some pictures are enclosed for you, though they are not good enough.

Dear Olma:

Many thanks for your Japanese
C.V. mortality data. Can
you give me ^{age-adjusted} "all-cause"
mortality for the same years
1950-72. Have you any
breakdowns by age, ^{decade} sex
ischemic H.D. mortality?

Cordially,
