Henry Blackburn, M.D.
Professor
Laboratory of Physiological Hygiene
Stadium Gate 27
University of Minnesota
Minneapolis, Minnesota

Dear Henry:

I was sorry that I only saw you from a distance in New Orleans. Unfortunately, I had to leave Tuesday afternoon so I didn't get around much down there.

I received the book "Measurement in Exercise Electrocardiography" this week and greatly appreciate your thoughtfulness. I am particularly pleased that both you and Dr. Simonson inscribed it.

I also thank you for your gracious hospitality on my recent visit to Minneapolis. I enjoyed the conference and the opportunity to see the inner workings of that mysterious Stadium Gate 27. It is a very impressive establishment. Maybe we could interest our Athletic Department in providing some laboratory space in the Michigan Stadium since our football coach has had a myocardial infarction.

Thanks again for the book and the opportunity to visit Minnesota and participate in the conference. Best wishes on your work and travels.

Sincerely yours,

Leon D. Ostrander, M.D.
