January 16, 1971

MEMO TO: Robin

FROM: Dr. Blackburn

Thanks for your 24 December note. It is important to look at all
repeatability tests openly even if they "don't look too good." This is the way
things are, and we must know it. It is the best possible way of finding out
what the readers probleme are and what the general coding problems are.
But send along another soon if you want, and let me know if its coming.
Thanks. See you soon.
