file correct.

Dear Henry,

Thanks for your frank letter. If mine to you was tactlessly worded, please accept my apologies. To quote a favourite saying of my grandfather's, "listen to what I mean, not to what I say."

I agree with you that we needn't be much fussed about racial balance among the faculty: the thing is to get the best people. The committee has in fact already decided invitations for 1974; but if these are not all accepted, and in any event for 1975 (if the seminars are still funded and alive), your suggestions of Gary Friedman and Hans Kuller will certainly be considered. (Unfortunately I have not personally met either of them.)

Warm regards,

Staff
