Correspondence

RECEIVED

AUG 17 1977

LAB OF PHYSIOLOGICAL
HYGIENE

Dear Henry:

Thank you very much for the copy of "Dietary Recommendations from Throughout the World" which you recently sent me. I find this to be an extremely useful document in firming up my own resolve to fight those doubting Thomas's who continuously challenge what I consider to be the gospel. I will never understand why the zealots espouse such violent enthusiasm for unproved hypotheses and disregard the preponderance of considered medical opinion which you have assembled. Perhaps this is the way of all zealots. I hope I am not one of them. With warm personal regards,

Very sincerely,

J.A. Schoenberger, M.D.
Professor and Chairman
