Dear Doctor Blackburn:

The Life Insurance Medical Directors of New England are sponsoring an exhibit at the Massachusetts Medical Society Meeting May 16-18. The basis for this exhibit will be the display put together by the Texas Medical Directors and shown at the Association Meeting in New York in October. We will supplement this with various publications and reprints, including a most excellent one by yourself and Mr. Parlin on "Antecedents of Disease--Insurance Mortality Experience.

Although we will have some give-away material, I would expect to have only a couple of your reprints available for use at the table in front of the exhibit, together with a means of collecting the names and addresses of those who might be interested in a reprint. Do you have enough reprints available to fill requests from medical visitors to the exhibit? I have only one copy of your reprint here, and would very much appreciate a couple of additional ones for use at the exhibit if you have them available.

Your review is certainly a very comprehensive one, up-to-date, and extremely valuable to anyone interested in the subject. It is just the kind of thing that we would like to display to summarize some of the literature in life insurance medicine.

With best wishes,

Very sincerely yours,

Rich Singer

Richard B. Singer, M.D.
Medical Director
