Dr. William A. Sodeman  
President, American College of Cardiology  
9650 Rockville Pike  
Bethesda, Maryland 20014

Dear Dr. Sodeman:

Thanks for your January President's Page, with its astute observations on the important impact of international contacts and communication.

I am enjoying doing a little thinking and writing here in Geneva, helping our International Society friends with European Heart Week, working with WHO Technical Groups, and generally propagandizing concepts of prevention and rehabilitation.

If you get through Geneva please let me know.

Cordially,

Henry Blackburn, M.D.  
Visiting Professor
