January 27, 1982

David H. Spodick, M.D., Director
Professor of Medicine
University of Massachusetts Medical School
Division of Cardiology
St. Vincent Hospital
Worcester, MA. 01604

Dear Dave:

Thank you for your kind note. I really had no idea Steven Scheidt would publish that miserable letter from George and decline to reply to it.

I am delighted to hear about the distinguished publication soon to appear in the Green Journal.

I really can't imagine anything more delightful than to sit with the appointed group in the hallowed halls of Erice for a week in May. However, at the risk of friendships and professional reliability, I have cancelled most of my travel for the coming year due to the heavy administrative demands of our new projects and the threats to my School and University from trickle-down Reaganomics. I guess this particular administrator won't be gadding about if we are to come out whole on the other side.

My apologies and best wishes to all in Erice. I am also cancelling Atlanta.

Cordially,

Henry Blackburn, M.D.
Professor and Director
