

January 16, 1971

Jeremiah Stamler, M.D.
Executive Director
Chicago Health Research Foundation
Chicago Civic Center, Room LL 139
Chicago, Illinois 60602

Dear Jerry:

In addition to Bill Kannel, who would be a great addition to the Gothenburg Seminar faculty, we should have Fred Epstein back this year don't you think?

Moreover Lew January is the new head of the International Affairs Committee of AHA. If we are going to have any bigwigs he should be one, preferably as a silent observer.

Would it not be useful to have you, Ancel and Lars Carlson on a panel to discuss hyperlipidemias and to expose the problem their classification and tailored treatments pose to coronary prevention?

Incidentally, I would be quite willing to yield "my place" to Bill or Fred. I don't consider myself a "stimulating" pedagogue, and I will have a rough schedule in August and September.

Regards,

Henry Blackburn, M.D.
Visiting Professor

P.S. to Stamler--Personal and Confidential: I spent an evening with Lars Carlson this week at our Swiss resort. He indicated Werko may return to Stockholm. This severely jeopardizes Tibblin's programs, as he seems to have antagonized most everyone else in Sweden. So it's a good moment for the seminar to be in Gothenburg. Be sure to clear quietly with Werko which Swedes should be invited, especially on Biork.
