Dear Henry:

This is a belated response to yours of August 27. First, enclosed is a copy of a short paper, "Perspectives on Prevention of the Mass Cardiovascular Diseases", prepared principally by Rose in behalf of the two of us at the request of Dr. Lysle Peterson, President, International Society of Cardiology. It is to be published in the ISC Bulletin.

As to the inquiry to the past Seminar Fellows, hopefully we will learn more about that when we see Richard and Geoffrey in Mexico. We will let you know.

I am not involved in any activities among children, except what we are trying to do in the team updating the ICHD report, in cooperation with Sam Fomon, clearly a job of intellectual exchange, and not any original research. I am more than overloaded with adult commitments! Perhaps you should address the question to Jim Schoenberger or Rick Shekelle. I know Rick is doing some things with children in cooperation with Dr. Robert Miller here.

How was Ireland? We missed you at the MRFIT Steering Committee. It was a good meeting. I want very much to have an opportunity to talk with you without our being too pressed time-wise about how we can all assist in solving some of the problems there, particularly in regard to intervention, now that the push for recruitment is over.

As Ron Prineas will tell you, we also had a very good CDP Steering Committee meeting in Bethesda.

All the best to Nellie and yourself,

Cordially,

Jerry
Jeremiah Stamler, M.D.

*Dear Henry - The paper
Jerry says so is at home
& I can't get it copied for
you. I'll see you return - will do!*
