Dr. Henry Blackburn
Professor
Physiological Hygiene
Stadium Gate 27
Minneapolis Campus

Dear Dr. Blackburn:

I appreciate very much receiving the copy of the WHO monograph you authored with Dr. Rose on "Cardiovascular Survey Methods." I am pleased to know of this activity, and, indeed, if you have a couple more copies available, I would like the chance to forward them to Dr. Ebert and to Vice President French as an example of the kind of resource the Laboratory could be to the clinical departments.

Thanks again, and congratulations on this accomplishment and recognition.

Very truly yours,

Lee D. Stauffer, Dean
