Dear Henry,

I wonder what happened to the New Event Study? Shipwrecked for having too many tables - taken another course in processing the data - or maybe completed?

Has your WHO Manual been published? If yes, would it be too much to ask you for a copy? Of course, only in case you got a dozen of it.

Has Karvonen & Keys: Physical Activity and the Heart been published? Publisher and price?

Has Caceres: Automated Electrocardiographic Diagnosis been published? What publisher and how expensive?

Would you, please, tell Nedra to let me send at regular intervals all new reprints from the Lab? Would you let me mail all reprints which arrived since Jan. 1?

Sorry for asking so many questions and favors.

Very best regards - and some nostalgic thoughts

Please mail reprints /books/ to my office address:
