*Trapp m/s.  
Send to cover note of  
thanks for inquiry.  
Dear Dr. Susser.*

Dear Henry Blackburn,

I was much intrigued by your abstract for the annual Epidemiology meeting of the American Heart Association about a teaching exercise you developed for medical students. I should like to try it out here at the College of Physicians & Surgeons. Frances Gearing on our faculty will probably be responsible for developing the session (I think she will be in touch with you directly). Meanwhile, I should be glad to have a fuller report of your paper if you have one available, and any other details and materials that you could supply. We shall much appreciate your help.

With kind regards,

Sincerely yours,

*Mervyn Susser*  
Mervyn Susser  
Professor and Head  
Division of Epidemiology
