Dear Tomi:

It looks as if our paper writing is always like a difficult parturition. But the enclosed proof is in good shape. Would you please see to it that the material we promised in Table III is sent to the American Documentation Institute as soon as we know the exact date for reference of the publication. I have copies here as well as the original of the amplitude weighting curve, in case readers request them.

This won't make you famous, but I predict that our paper on extrasystoles will.

Regards,

Henry Blackburn, M.D.
