Dear Henry:

I was on vacation during late October and early November so that when I returned I found a mountain of mail and buried inside in a brown envelope (somehow brown envelopes have the lowest priority!!) was your excellent paper about standard diagnostic criteria for automated electrocardiographic systems. I discovered it a few days ago. I agree with nearly everything you indicated in the paper.

You seem to be satisfied with simply suggesting action. There is need for active leadership and push in this area, which I think you can provide. I know of your interest in this topic and hope that you will find the time to move.

If there is anything I can do, please let me know. With best wishes for a Happy New Year.

Sincerely yours,

Naip
