COPYES - WALKER

July 1, 1982

Weldon J. Walker, M.D.
650 Royal Avenue
Medford, OR. 97501

Dear Friend:

In going through one of many piles around my desk, I found, to my chagrin, your provocative manuscript. I believe you sent it to me after our March, 1981 symposium in San Francisco.

I think it is still useful and thoughtful and return it to you in hopes you will get it published.

I guess I believe the tone is excessively suspicious when there is surely no conspiracy to suppress information -- just inadequate surveillance and leadership.

Cordially,

Henry Blackburn, M.D.
Professor and Director
