August 15, 1975

Warren Winklestein, Jr., M.D.
Department of Epidemiology
University of California
Berkeley, California 94720

Dear Warren:

The enclosed is not and will not and must not be sent for publication, but I got it off my chest. I was dumbfounded and remain puzzled by the apparent misconstruction of the need for preventive trials, often necessary antecedents to public health action, but not necessarily the models for such action.

Cordially,

Henry Blackburn
lmb
