Dear Colleagues:

If Dr. Earle passed on his records to you, you will probably note that I and my staff have provided fairly frequent criticism services to the journal over recent years. We have enjoyed this and profited by it. I am sure you will be choosing a new editorial board and suspect that this would be a good time for me to move off in favor of other heavy commitments to my institution and elsewhere.

You may or may not want to consider the two people on my faculty who have borne a major load beside myself. An opinion from David Earle about their contribution would, I am sure, be forthcoming. Dr. Richard F. Gillum has reviewed articles mainly concerned with descriptive epidemiology and with hypertension, while Dr. David Jacobs Jr. has reviewed in the area of statistics, nutrition, and blood lipids.

Best of luck with the journal.

Sincerely,

Henry Blackburn, M.D.
Professor and Director
