Dear Igor:

I am late in acknowledging receipt of your report on an integrated program for prevention, NCD/82.2. It is a very useful document. I am sorry that I could not be there to better represent the community efforts ongoing in this country of which there is no mention in the section by Manning Feinleib.

Your document should become a classic. It is extremely concise and thoughtful. Many thanks.

Cordially,

Henry Blackburn, M.D.  
Professor and Director
