Dear Henry

Many thanks indeed for your very kind letter of 27 January.

I am delighted that somebody read my article and your comments are greatly appreciated.

I have not heard of your programme for chronic disease prevention. I would be extremely interested to receive a copy of it. I am not sure whether you are aware of the WHO NCD Programme in this field. I recently chaired a WHO meeting in Russia on this subject. I enclose a copy of the draft report of the meeting. Please note that this is absolutely confidential to you. I am not really sure whether I am allowed to distribute it, but since most of it was prepared in this Department, I am sending you a personal copy.

I would be extremely grateful for any information on what you and others are doing in the States because actually there has not been all that much discussion of US schemes.

I am delighted to hear that you have taken over the Department of Epidemiology - very appropriate.

When are you coming over here? We are surviving - just about - but life is not easy.

With all good wishes.

Yours sincerely

Walter W. Holland
