Dear Ancel:

In association with the Colloquium in Henry's honor, (program enclosed) I am attempting to get a Regents Award through the process. They have abolished the one that is most appropriate, the Regents Citation of Outstanding Merit for retiring members of the academic staff, but there is another distinguished award called the Outstanding Achievement Award (for alumni), and I think I am going to run it through that channel since there doesn't seem to be any other appropriate one. It requires letters from distinguished people who know the nominee personally and which attest to prominence and outstanding achievement in community, state, national, or international level and unusual distinction in a chosen field. If you would be willing to compose such a letter that I could enclose with the documentation, I think it would be very good. I am also asking Carleton Chapman and Larry Rowell.

Cordially,

Henry Blackburn, M.D.
Professor and Director

HB/jml
