Dr. Ratko Buzina  
Department of Nutrition  
Institute of Public Health  
Rockefellerova 7  
Zagreb 1, Yugoslavia

Dear Ratko:

I should have spoken of it earlier, but if any forms are not yet sent we would like to have them sent air freight, to expedite their processing. If this can be done let me know and I will arrange coverages of expenses from here. Otherwise we await their surface arrival.

There are small problems with a few duplicate serum spots and their identification which we will write about after photocopying the spots for the explanations of our problem.

Hans Friedrich or Pentti will contact Mirjana soon about the possibility of helping out the last two weeks in January for tape recording in the Belgrade faculty group.

I expect Dr. Keys to plunge into the 5 year data analysis starting this week.

The record you will soon receive is a "kid" I "discovered" five years ago and helped convert from modern to traditional jazz. He is now surely the outstanding traditional piano player in the world.

Best regards,

*Butch  
Thompson!*

Henry Blackburn, M. D.
