Dr. Ivan Mohacek
Interna Klinika, Rebro
Zagreb, Yugoslavia

Dear Ivan:

Dr. Christ Aravanis (37 Vasilissis Sophias Av., Athens) advises that the work on Crete will start in "mid-August" (exact date not yet stated), and will last a month (4-5 weeks). And of course, we are counting on your good collaboration there. An Agreement, enclosed, covers finances; please sign and return three copies promptly, and retain one copy for your files.

I have asked Dr. Aravanis to send you at once an invitation letter to help with visa, etc. No doubt he will tell you just when you should arrive in Athens and he will reserve a seat on the plane to Iraklion.

For the work in Crete there is great need to use the Elema Mingograf you have in Zagreb. I trust you can take that with you to Greece and that Dr. Aravanis can assure getting it through the customs. Recording paper, ink and rollers should be provided to take both resting and post-exercise E. C. G. s on some 600+ men. As soon as I hear from you that you will be taking the Elema I shall order the recording paper, etc., to be sent directly from Stockholm to Dr. Aravanis. And if there are any repairs, etc., needed for the Elema, I shall arrange to re-imburse the costs.

Please let me know at once, also, how and where the funds covered by the Agreement are to be paid.

Henry Blackburn, Margaret and I expect to be in Greece for the start of the work in Crete. I am sure you will find the place delightful and we look forward to seeing you there.

Sincerely,

Ancel Keys, Director
