Saturday  
July 11 (1981)

Dear Angel:

Our stay at Minnetonka with you and Margaret was a pleasure. The bed board made sleeping excellent. Cay and I enjoyed getting to know Amanda and Harvey better than we had in the past. They are not only talented but also great company. Margaret's cooking, as usual, out of the top drawer. In particular, the Vitello Marsala was the best I have ever had.

It has been some time since I have had the opportunity to sit thru a meeting devoted to a reasonably systematic coverage of the several aspects of the scientific knowledge of the development of COPD. So the meeting was of some use to me.

On the other hand, something else happened which is of more consequence. a large number of distinguished scientists and well-informed investigators went on the record that it did, as Benny Lewis says, all start in Minneapolis.

Manis says that the proceedings will be published as a book and I hope this will happen. &

I would like to write Bill Parlin and hope that you have his address.

~~This was returned~~ I am enclosing a check for \$25.00 to cover the costs of the toilet seat cover which broke when I sat on it during the excitement about Bill and forgot to discuss it with you as ever

Benny
