

July 13, 1973

Senator Walter Mondale
443 Old Senate Building
Washington, D.C. 20510

Dear Senator Mondale:

I support attempts to develop energy research other
than conversion of coal to liquid fuel and the nuclear research,
which are distorted priorities, I believe.

I support research on mass transit, from highway
trust funds.

Sincerely,

Henry Blackburn, M.D.
Professor and Director
