Dear Carl:

As you can see in this "final" version of the Henry Taylor Program, we have Paco Grande summarizing his contributions to physiology, and me his contributions to epidemiology, and you as banquet speaker. I hope that you are comfortable with this.

I am attempting now to get an Outstanding Achievement Award nomination through the Board of Regents, hopefully by the end of May, and wonder if you could provide me soon a letter of appraisal "from distinguished people, preferably people who know the nominee personally." The award is given to University alumni who attain unusual distinction in their chosen field, who demonstrate outstanding achievement on the community, state, national, or international level. The letter should attest to the prominence of the individual. Enclosed is Henry's CV and publications list. I hope you will be willing to do this. I am also asking Maurice Visscher, Larry Rowell, and Ancel Keys for letters.

Things are moving along well for the conference with the exception of financial support. I am not very good in "non-peer review proposals" for funding. I particularly need support to bring a few people from overseas, if you have any ideas. It would also be nice to get funds to support your expenses, and I will try.

Cordially,

Henry Blackburn, M.D.  
Professor and Director

HB/jml
