July 15, 1982

Thomas Cook, Ph.D.  
Department of Psychology  
Northwestern University  
Evanston, IL 60201

Dear Tom:

We did better than last year to get to you minutes of the May SAB meeting of the Minnesota Heart Health Program. We will do still better next year! There are a few attachments and notes on the minutes which indicate action coming out of our discussions and your recommendations, especially the Sample Size plans on page B-7.

In addition, you will find enclosed 1) our contribution to a set of four manuscripts forwarded to Circulation, one each from the three NIH-sponsored community projects, and a speech by R. Levy at the time we described these programs at the American Heart Association meeting; 2) an appendix (not to be published) which gives the "flavor" of MHHP at mid 1982, which I recently composed by the interview method with our section heads.

I hope you will find each of these useful as follow-up to our meeting and as a reference. We naturally invite your suggestions, comments and criticism, and remain most grateful for your recent and past interest, support, and valuable contributions.

Sincerely,

Henry Blackburn, M.D.  
Professor and Director  
Principal Investigator
