Dr. Ancel Keys
Parco Grifeo 30
Naples, Italy

Dear Ancel:

Thanks very much for your very nice letter from your new abode in Naples.

I am so pleased that the Makarska party went so well and accomplished so much. I was very much impressed, as I am sure not only all the other members of the Committee were but also other guests and visitors like Akhmetely, and it was especially good to observe the 5-year follow-up research actually in progress with so many new and useful instruments.

Thank you very much for the account of Vastesaeger's new research, which needs a good deal of looking into before it is acceptable. *for support?*

*Our best to Margaret
and the children*

Sincerely yours,

Paul J. White
