Dear Lew:

I have just returned from Chicago where I saw Lars Werkö. We talked briefly about the evaluation of results of cardiovascular surgery but I did not have the correspondence with me.

I would now like to suggest that we really ought to have one or two people from Asia in addition to an Indian and these people should represent Australia and Japan, or at least one of these countries, Australia preferable, if we can take only one instead of both.

I think Lequime would be a good man from Belgium, unless he can suggest somebody else to represent Belgium, even if he is too busy.

I quite agree that you'll need more than 2 hours and 45 minutes in New Delhi, but I guess you'll have to take that up with Ancel Keys and the Indians.

I am delighted with the general overall plan and very appreciative of your help.

Sincerely yours,

PDW:ew

P.S. I would also suggest adding heart wounds to the list of subjects and I think that you should retain the artificial prostheses.

cc: Dr. A. Keys
