

January 11, 1967

The Honorable Orville Freeman
Secretary of Agriculture
Dept. of Agriculture
Washington, D. C.

Dear Sir:

Your resistance ^{to} of modification of PL 89-544 is supported. The rule change requested, for exercise of laboratory animals, is simply impractical, is based on an emotional appeal, and would seriously cripple (human) life-saving research.

Sincerely,

Henry Blackburn, M. D.

HB/jea

CC: Congressman MacGregor
