Dr. Ancel Keys
 Professor Emeritus
 410 Groveland Avenue *No 902*
 Minneapolis, MN 55403

Dear Ancel:

I just received word of Austin Henschel's death. His former secretary sent me the enclosed information and I pass a copy on to you in case you haven't heard.

Not long ago, I learned of your personal tragedy with the loss of your daughter. Both Mable and I express our sympathy. We didn't know her all that well, but certainly remember her as a child.

The review I prepared of the early history of the Laboratory of Physiological Hygiene will be published in the next volume of Exercise and Sports Sciences Reviews. This series is an undertaking of the American College of Sports Medicine, and the Publications Committee decided to have the article published there. I'll provide you with a copy when the publication comes out.

Mable sends her best, but she has been incapacitated due to both a wrist and lower left leg fracture sustained during a severe fall. As a consequence, I've had to take on more domestic chores than usual. Nevertheless, Mable has been engaging in rigorous rehabilitation and should be relatively mobile by this next fall season.

Sincerely yours,

Buskirk

E.R. Buskirk, Ph.D.
 Professor of Applied Physiology

ERB/bmm

Enclosure

P.S. I'll be willing to prepare a short summary of Austin's contributions for the Physiologist unless you plan to do so. Please let me know your preference.
