Dr Ancel Keys,
Laboratory of Physiological Hygiene,
University of Minnesota,
Stadium Gate 27,
MINNEAPOLIS 14.
MINN. U.S.S.A.

Dear Ancel,

It was most kind of you and Margaret to have sent me a copy of your new book. It is a very fine effort and will prove of great value to the afflicted multitudes. It makes life easy for me because, instead of spending time and effort explaining to my patients the "open sesame" to clean intimas, I merely prescribe one book - "Eat Well and Stay Well".

I thank you too for the communications about the electrocardiographic nomenclature as well as for reprints of your recent publications, all of which, as usual, are both profound and of great interest to me. I might add that, although I have a deep respect for the fats, I still remain a devout "thrombogenecist".

With kind regards,

Yours very sincerely,

Mose M. Suzman

M.M. SUZMAN.

P.S. It was a great joy having Paul and Ina White stay with us. When are you due for your next trip?
