Dear Jerry and Rose:

It is now clear that we cannot get to southern Italy with the kids during the time you are there. They and Nelly will also not be here at the time of your travel, but will be in Paris, while I am here in Geneva. Would you and Rose consider at all a stop - over in Paris or Geneva of one day en route to Rome? There are a number of questions it would be useful to visit about before Gothenburg:

The Gothenburg Program
The Vienna Report 3rd draft
The two CDP 2nd drafts
The Hypertension Trial
The future.

Several are things that we need to finish up before Gothenburg. I will have no time for any sustained writing effort after 1st August for about 3 months!

One of several added attractions in Paris would be your meeting Daniel Schwartz and the G.R.E.A. group - if you wanted to.

I am going mountain climbing with Larry Rowell and Eddie Leuthold July 17-19, but as I recall, you were travelling on 22 July and it would be quite easy for me to come to Paris at that time. Otherwise, except for Nelly's absence, there would be other advantages if you came by Geneva.

Think it over please and write or call. Thanks.
Home: 25-91-37. Office: 24-13-48.

I am urgently in need of your comments, however brief, on CDP manuscript No. 1 on the "ECG and Prognosis". The ectopic beat manuscript is not nearly far enough along for you to bother with, though as you know, Tomi just completed our analyses, and I will finish the first main draft this month.

Regards
