Cincinnati, OH. 45267

Dear Charlie:

You may not have seen the enclosed small contribution, and we had not seen yours in the same journal at the time of publication. It seems to me that it would be very important if these studies could be extended to test a little more effectively your very important idea that effect of alcohol is strongly related to energy balance as well as diet composition and duration of intake.

Cordially,

Henry Blackburn, M.D.
Professor and Director
