**Dr. Pierre W. Duchosal
Faculte de Medecine
24 Bd. Des Philosophes
Geneva, Switzerland**

Dear Pierre:

At long last we are home in the cold of Minnesota where we find all well and overly busy. This is only a note to tell you that you should be proud of the way the Congress went in New Delhi. Great credit should go to your efforts as well as to Paddy and a few others who worked hard to make the occasion the success it was. For my part, I hope the Research Committee made a useful contribution to the arrangements.

I left New Delhi in some doubt as to what is to be the role of the Research Committee and its successor(s). I shall, as charged, at once get busy organizing a "Council on Epidemiology and Prevention." Jerry Stamler (who was with us in Hong Kong and later in San Francisco), will give active help. I shall keep you, Kempson Maddox, Jean Lequime, and Vittorio Puddu informed and earnestly request advice from you all.

With best wishes to you and your family from Margaret and myself.

Sincerely,

Ancel Keys, Director
