Dwayne Reed, M.D., Ph.D.
Honolulu Heart Program
347 North Kuakini Street
Honolulu, Hawaii 96817

Dear Dwayne:

If the material that Dan McGee presented in Washington at the American Heart meeting is available in preprint (or when it is available), I should be very grateful to receive a copy. This had to do with the unusual relationships between calorie, fat intake and blood lipids, cancer, coronary and overall mortality in the Honolulu Study.

A bunch of the old timers were gathered at the Europa Palace Hotel on Anacapri for a little chit-chat and good society in honor of that old curmudgeon, Ancel Keys.

I hope to see you in your new lair before too very long. Don't forget to look up my friend, David Pacquette, the piano player at the Pioneer Inn in Maui, on your next trip out there. He is a delightful madman.

Cordially,

Henry Blackburn, M.D.
Professor and Director
