University Clinics  
St. Raphael,  
BELGIUM

Dear Friends and Colleagues:

I very much enjoyed reading your splendid document on the Epidemiology of Arterial Blood Pressure sent to Dr. Keys for review. It is a most valuable compendium. It is so good to have finally in one place all your significant contributions on the epidemiology of arterial blood pressure, as well as others.

The enclosed is my amateur effort in regard to dietary aspects prepared for the U.S.-Italian Health Treaty.

Cordially,

Henry Blackburn, M.D.  
Professor and Director
